NITROGEN GENERATOR FACTORY

GENERATORS OF NITROGEN FROM COMPRESSED AIR FOR THE FOOD AND
PETROLIFER INDUSTRIES

MODULAR WATER TREATMENT PLANT

FEATURES:

- Structure - Container type
- Cover - Galvanized steel sheet
- Enclosure - Polyurethane sandwich panel with galvanized and lacquered steel sheet
- Windows - Lacquered aluminum windows with gratings
- Door - Metallic lacquered in white
- Floor - Metallic welded in one piece, painted non-slip
- Roof - Polyurethane sandwich deck panel
- Sanitary installation - Ceramic washbasin, shower and toilet
- Modular and stackable
- Electrical installation
- OPTIONAL: PVC flooring - door and window protection system

MODULAR WATER TREATMENT PLANT

COMPONENTS:

1 Water tank 150 cm diameter, 170 cm h, 2,000 l capacity

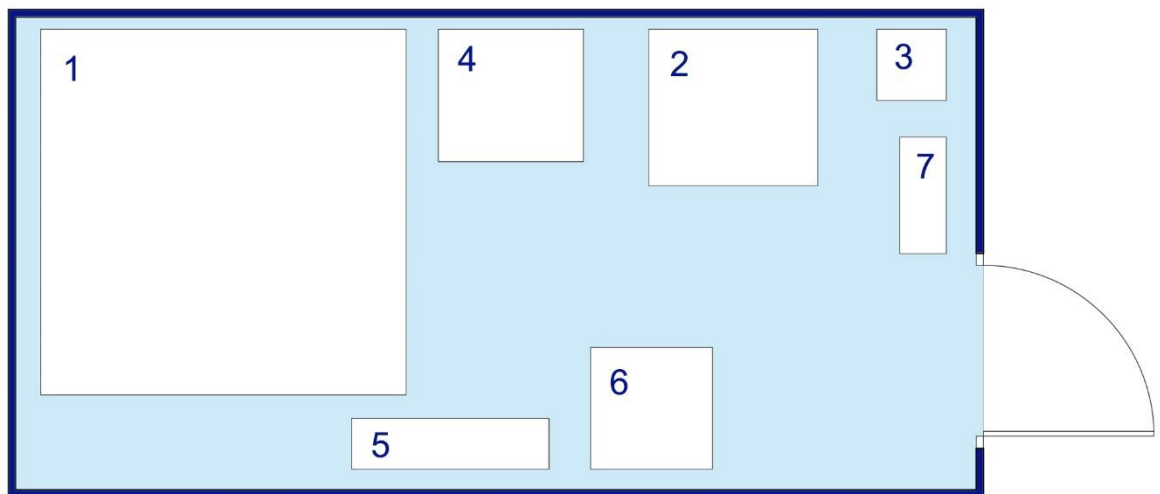

2 Filtration

3 Prefiltration

4 Disinfection

5 Reverse osmosis treatment

6 Water tank 50 cm diameter, 100 cm h, 200 l capacity

7 Control Box

MODULES

Premium materials, our floor is a galvanized steel structure with dashboard, unlike the usual agglomerate, this provides our products with a longer life.

Durability, our support structure is designed for perfect ventilation, thus avoiding the filtration of humidities from the ground, providing our modules with a longer life.

Easy cleaning, only water pressure is necessary to maintain a complete cleaning of our modules, quickly and conveniently.

WE MANUFACTURE:

SMALL BUSINESS
INSULATED MODULES
NON- INSULATED MODULES

SHIELDED MODULES

We manufacture to your needs, both in our standard models and non-standard models, we can customize your house with:

- Electrical installation.
- Cold / heat system installation
- Installation of wheels with caravan couplings and folding supports in the four corners.
(For modules of 3 and 4 meters. NOT APPROVED FOR ROAD CIRCULATION).
- Possibility of making it a high security office.

We have a wide variety of models. All of them are available for applications such as bar, surveillance, ticket sales, exhibition, sanitary, etc.

ANY FURTHER CONTAINER, PLEASE FEEL FREE TO
CONTACT US

INSULATED MODULES

FEATURES:

- Structure - Container type.
- Roof Panel Polyurethane sandwich with double metal ceiling welded.
- Enclosure - Polyurethane sandwich panel with galvanized and 40 mm lacquered sheet steel.
- Sliding windows - White lacquered aluminum joinery with grilles.
- Door - Metallic lacquered in white.
- Floor - Metallic welded in one piece, painted non-slip.
- Roof - Sandwich or metal cover panel in one piece.
- Sanitary installation - Ceramic washbasin, shower and toilet.
- Modular and stackable.
- Electrical installation.

- OPTIONAL: PVC floor-protection system in door and windows.
Opening for forklifts.
Air conditioner.

PATENTED (PATENT N° 200701148)

IN A CONSTANT PROCESS OF IMPROVEMENT OF OUR PRODUCTS AND SERVICES TO OUR CUSTOMERS, WE HAVE DESIGNED A NEW ISOLATED MODULE.

INSULATED MODULES

SM 1,75 - A
1.750 X 900 X 2.450 (mm)

SM 2,5 - A
2.440 X 1.630 X 2.425 (mm)

SM 3 - A
3.130 X 2.440 X 2.425 (mm)

SM 4 - A
4.130 X 2.440 X 2.425 (mm)

SM 6 - A
6.130 X 2.440 X 2.425 (mm)

SM 6 - A - S
6.130 X 2.440 X 2.425 (mm)

SM 7 - A
7.130 X 2.440 X 2.425 (mm)

SM 7 - A - 2
7.130 X 2.440 X 2.425 (mm)

SM 7 - A - 2 - S
7.130 X 2.440 X 2.425 (mm)

INSULATED MODULES

SM 8 - A
8.130 X 2.440 X 2.425 (mm)

SM 8 - A - 2

DIFFERENT CONTAINER MODELS

C 3 - 7 m²
3.000 X 2.400 X 2.590 (mm)

C 4 - 10 m²
3.920 X 2.400 X 2.590 (mm)

C 6 - 15 m²
5.700 X 2.400 X 2.590 (mm)

FEATURES:

Container made from steel coil, not parts, cut and folded in our facilities, which allows us to offer them a higher quality, as well as a uniformity in the materials used.

Safety, our containers are considered as authentic safes, in addition to their robustness they have two anti-theft security locks.

Our containers are always of new manufacture, reason why the useful life is much greater, always starting from materials of first quality.

Recommended as a large safe for all types of items (documents, tools, high value material, etc ...).
